

E-COMMERCE GROWTH CASE STUDY

Drive revenue and reduce cost per acquisition through
optimized ad strategy

ACCOUNT BACKGROUND

The client is a U.S.-based eCommerce store offering a wide range of consumer products. While they had steady traffic and sales, their Google Ads campaigns were inefficient, with high acquisition costs and low ROAS.

They partnered with us to optimize their ad performance — aiming to lower cost per conversion, improve ROAS, and boost revenue without increasing their ad spend.

THE CHALLENGE

- Rising cost per conversion
- Unstable ROAS
- Low conversion value relative to ad spend
- Lack of strategic bidding and targeting

The client faced rising cost per conversion and unstable ROAS, making their ad spend inefficient. Additionally, poor bidding strategies and weak audience targeting limited their ability to scale profitably.

OUR STRATEGY

- Switched to Target ROAS bidding for better efficiency
- Optimized product feed and added high-performing custom labels
- Implemented dynamic remarketing to recover cart abandoners
- Refined audience segmentation by device, location & in-market interests
- Used seasonal ad copy and updated creatives for higher CTR
- Paused underperforming SKUs and focused on high-margin products

RESULTS (LAST 30 DAYS)

POST-OPTIMIZATION RESULTS

- Clicks: 1.73K
- Conversion Value: \$32.7K
- Cost per Conversion: \$23.85
- Actual ROAS: 553.47%

KEY WINS

1. Dramatic ROAS Surge:

- Improved to 553.47%, showing 5.5x return on ad spend

2. Strong Revenue Impact:

- Generated \$32,700 in sales from just 1.73K clicks

KEY WINS

3. Low Cost per Conversion:

- Achieved \$23.85 per sale, significantly below industry average

4. Better Conversion Funnel:

- Focus on remarketing + high-intent audiences led to consistent daily results

5. Smarter Ad Spend:

- No wasteful traffic — each dollar spent was optimized toward results

CONCLUSION

With a clear focus on smart bidding, product-level targeting, and audience intent, we transformed a previously unstable campaign into a highly profitable and scalable eCommerce channel.
