CASE STUDY

OVERVIEW

Website: GaladariLaw.com

Industry: Legal Services
(Personal Injury Law Firm)

Location: U.S.-based, multi-regional presence

Project Duration: ~6 months (Sep 2021 - Feb 2022)

BACKGROUND

Galadari Law is a U.S.-based law firm specializing in personal injury cases including car accidents, wrongful death, and medical negligence. Despite a modern website, their visibility in Google search was nearly nonexistent.

Initial pain points:

- Only 3–5 organic clicks per day
- Weak keyword rankings (page 3+)
- No structured internal linking
- Bounce rate of 30%
- No SEO-focused content strategy

Goal:

To build authority, rank for high-intent legal keywords, and drive leads through organic traffic.

CHALLENGES

The legal niche is among the most competitive in SEO. Galadari Law was nearly invisible on search engines despite having a professional site. Our mission: make them visible, authoritative, and profitable.”

- No ranking for key service pages
- No internal linking strategy
- Thin or unoptimized content
- Technical SEO gaps
- No authority signals in SERPs

SEVERAL KEY ISSUES WERE IDENTIFIED DURING THIS PERIOD

SEO GAPS IDENTIFIED:

- **No Keyword Map or Funnel Strategy**

The site lacked a structured plan targeting high-converting keywords across the buyer journey.

- **Weak Metadata and Slug Structure**

Titles, meta descriptions, and URLs weren't optimized for search intent or keyword relevance.

- **Duplicate Content Issues**

Multiple pages had overlapping content, confusing search engines and diluting authority.

- **Pages Missing Schema & Structured Data**

The website had no JSON-LD or schema markup, which limited visibility in rich results.

- **Thin or Unoptimized Content**

Most service pages had shallow content that didn't answer user queries or include key terms.

- **No Internal Linking Strategy**

Pages weren't connected with keyword-rich anchor text, leading to poor SEO flow and authority distribution.

- **Lack of Backlinks and Off-Page Signals**

The site had very few quality backlinks, hurting its domain authority and competitive ranking power.

SEO STRATEGY

We executed a comprehensive SEO strategy covering technical fixes, keyword mapping, content creation, and structured on-page optimization. By combining Yoast best practices, local SEO targeting, internal linking, and backlink building, we built strong organic authority. This multi-layered approach led to massive visibility gains across high-intent legal keywords and locations.

Full-Spectrum SEO Campaign - One-Line Explanations

Keyword Research & Mapping

Identified high-intent, location-based keywords and mapped them to relevant pages for maximum targeting.

Technical SEO Fixes

Resolved crawl errors, improved site speed, and optimized mobile performance for better indexing.

On-Page SEO (titles, meta, schema, image SEO)

Optimized every page element to align with search engine best practices and user relevance.

Internal Linking (anchor optimization by city/service)

Built contextual links between service/location pages using strategic, keyword-rich anchors.

Long-form Content Creation (3,620+ words)

Developed in-depth, SEO-friendly articles that matched search intent and earned topical authority.

Strategic Backlink Acquisition

Secured authoritative backlinks to boost domain credibility and improve SERP visibility.

**All Green SEO
Signals using
Yoast**

Achieved perfect Yoast SEO scores by following every on-page best practice, from keyphrases to structure.

**Local SEO Signals
for Boulder,
Longmont,
Greeley, etc**

Enhanced local visibility by optimizing NAP info, geo pages, and city-specific keyword placements.

Target

CONTENT OPTIMIZATION

- Used focus keyphrase in: slug, title, meta, intro, subheadings
- Article word count: 3,620 words
- Yoast SEO score: 15/15 green
- Keyphrase used 18 times for strong density
- Internal links, schema, image alt tags fully optimized

Internal Linking Highlights:

- 150+ contextual links added
- City + service combo:
- “Longmont Car Accident Lawyer”,
- “Boulder Brain Injury Attorney”, etc.
- Focused on page-level authority & flow

TOOLS & TACTICS

SEO Stack Used:

- Ahrefs – Backlink gap, keyword difficulty
- SEMrush – Content audit, domain tracking
- Surfer SEO – NLP content scoring
- Google Search Console – CTR & impression monitoring
- Google Analytics – Bounce rate and goal tracking
- Yoast SEO – On-page SEO validation
- Screaming Frog – Crawl diagnostics

RESULTS

GSC Report:

- Total Clicks: 102,000
- Total Impressions: 6.41 Million
- Avg. Daily Clicks: 3 → 2,500+
- CTR: 0.6%
- Keyword Rankings: Many moved from Page 3 to Page 1
- Bounce Rate: Dropped from 30% to 8%

Website Traffic: Before & After SEO Implementation

▼ Before SEO:

- Daily Organic Clicks: 3-5 clicks/day
- Monthly Clicks: ~90-150/month
- Impressions: Minimal visibility in search results
- Bounce Rate: 30%

WINS & HIGHLIGHTS

- Massive traffic growth in 6 months
- High-ranking location-based keywords
- 360° on-page optimization framework
- Internal links built authority across 30+ services
- Lower bounce = higher leads

“We turned an invisible site into a local legal powerhouse”

CONCLUSION

This case study proves that a strategic, full-spectrum SEO approach can deliver exponential growth — even in highly competitive industries like legal services. By combining technical fixes, content optimization, internal linking, and local SEO, we transformed Galadari Law's online presence from invisible to dominant. The results speak for themselves: higher traffic, stronger rankings, and long-term visibility that drives real business impact.
