

GOOGLE ADS CASE STUDY

Boosted Online Sales for
established E-commerce brand
From 150% ROAS to 600% ROAS in 1
Year with Google Ads.

Prepared by:
Shahzad Ahmed

CLIENT OVERVIEW

An established e-commerce brand struggling to maintain a positive return on ad spend (ROAS) and needing to boost online sales.

CHALLENGES

The client was stuck in a rut with a stagnant ROAS of 150%.

- Improve campaign efficiency and profitability.
- Generate a significant increase in online sales.
- Revitalise their online presence and attract new customers.

SOLUTION

I implemented a comprehensive Google Ads strategy to address the client's challenges:

COMPREHENSIVE CAMPAIGN AUDIT

Identified areas for improvement in existing campaigns, such as keyword targeting, ad copy effectiveness, and landing page conversion optimization.

ADVANCED KEYWORD RESEARCH

Uncovered new high-value keywords with lower competition for targeted ad campaigns.

TARGETED SEARCH CAMPAIGNS

Created targeted ad groups focused on specific product categories and user intent.

TARGETED SHOPPING CAMPAIGNS

Created targeted shopping campaigns focused on specific product categories

BUDGET OPTIMIZATION

Implemented a data-driven budget allocation strategy:

STARTED WITH A TARGETED BUDGET

Established a baseline budget aligned with the client's goals and limitations.

MONITORED CAMPAIGN PERFORMANCE

Continuously monitored key metrics like clicks, Conversion, Conversion value & ROAS.

PERFORMANCE-BASED INCREASES

Continuously monitored key metrics like clicks, Conversion, Conversion value & ROAS.

A/B TESTING OF AD VARIATIONS

Tested different ad copy, visuals, and calls to action to identify top performers that resonate with the target audience.

LANDING PAGE OPTIMIZATION

Streamlined the user journey and implemented conversion rate optimization (CRO) strategies to boost conversions.

RETARGETING CAMPAIGNS

Reconnected with website visitors who showed interest but didn't complete a purchase.

REGULAR PERFORMANCE MONITORING AND ADJUSTMENTS

Continuously monitored campaign data and made data-driven adjustments to optimise performance.

RESULTS

Our data-driven approach to Google Ads management delivered exceptional results for the client:

- Increased ROAS by 300%: ROAS grew from 150% to a staggering 600% within 12 months, demonstrating a significant improvement in campaign efficiency and profitability.
- Explosive sales growth: The client experienced significant growth in online sales, exceeding initial sales targets and propelling brand success.
- Established brand awareness: Google Ads campaigns successfully drove targeted traffic to the website, increasing brand awareness and attracting new customers.

GOOGLE ADS CASE STUDY 2

Local Business Looking to Increase Calls and Store Visits through Google Ads Campaigns

A new local business looking to attract customers and generate in-store traffic and phone calls.

CHALLENGES

Being new to Google Ads, the client faced initial hurdles in reaching their target audience and driving qualified leads. They needed to:

- Increase brand awareness and local visibility.
- Attract potential customers searching for their products or services in the local area.
- Generate more phone calls and in-store visits for conversions.

SOLUTION

I implemented a targeted Google Ads strategy specifically designed for local businesses:

LOCATION TARGETING

Ensured ads were displayed to users searching for relevant keywords within the client's service area.

TARGETED SEARCH & LSA CAMPAIGNS

Created targeted ad groups focused on specific keywords and user intent.

PPC

BUDGET OPTIMIZATION

We implemented a data-driven budget allocation strategy:

STARTED WITH A TARGETED BUDGET

Established a baseline budget aligned with the client's goals and limitations.

MONITORED CAMPAIGN PERFORMANCE

Continuously monitored key metrics like clicks, calls, and store visits.

PERFORMANCE-BASED INCREASES

Based on positive performance, strategically increased the budget, ensuring efficient spending.

CALL EXTENSIONS

Added call extensions to ads, allowing potential customers to connect with the business directly from the search results page.

LOCATION EXTENSIONS

Include location extensions displaying the business address and phone number on the ad, making it easy for users to find them.

CALL-TO-ACTION (CTA) FOCUSED AD COPY

Crafted clear and concise ad copy with strong CTAs encouraging calls and store visits.

LANDING PAGE OPTIMIZATION

Optimised website landing pages to provide a seamless user experience and conversion opportunities.

REGULAR CAMPAIGN MONITORING & OPTIMIZATION

Continuously monitored campaign performance, adjusted bids, and tested ad variations to maximize results.

RESULTS

After three months of managing their Google Ads campaigns, the client experienced significant growth in key local business metrics:

- Increased Calls: The number of phone calls generated through Google Ads campaigns saw a noticeable increase.
- More Store Visits: Foot traffic to the store significantly improved, demonstrating the effectiveness of the campaign in driving local customers.
- Improved Brand Awareness: Local visibility and brand awareness increased, leading to a wider customer reach.

GOOGLE ADS CASE STUDY 3

Scaling A High-Ticket Hardware E-commerce Store with Google Ads

A high-ticket hardware e-commerce store, new to Google Ads and seeking significant sales growth

CHALLENGES

The client needed a strategic approach to Google Ads to achieve their ambitious goals.

Key challenges included:

LIMITED EXPERIENCE WITH GOOGLE ADS

The client was unfamiliar with the platform and required expert guidance to navigate its complexities

HIGH-TICKET PRODUCTS

Converting potential customers for expensive hardware requires a targeted and effective marketing strategy.

SCALABILITY

The client desired to significantly increase online sales and website traffic.

SOLUTION

Implemented a comprehensive Google Ads strategy tailored specifically for the client's high-ticket hardware products:

Phase 1: Building a Strong Foundation (Months 1-3)

PRODUCT FEED OPTIMIZATION

Created and optimised a comprehensive product feed that included high-quality product images, detailed descriptions, accurate specifications, and competitive pricing.

TARGETED SHOPPING CAMPAIGNS

Launched targeted Google Shopping campaigns focusing on relevant product categories.

BID MANAGEMENT STRATEGIES

Implemented smart bidding strategies to optimise ad placement and maximise return on ad spend (ROAS) for high-value conversions.

Phase 2: Optimization and Growth (Months 4-12)

CAMPAIGN PERFORMANCE MONITORING

Continuously monitored campaign performance, analysing click-through rates (CTR), conversion rates, and cost-per-acquisition (CPA) to identify areas for improvement.

FEED ATTRIBUTE OPTIMIZATION

Regularly reviewed and optimised product feed attributes, including titles, descriptions, and custom labels to enhance ad relevance and user experience.

REMARKETING CAMPAIGNS FOR ABANDONMENT

Launched segmented remarketing campaigns targeting website visitors who abandoned their carts or engaged with specific high-ticket products.

BUDGET ALLOCATION BASED ON PERFORMANCE

Strategically allocated budget based on campaign performance, prioritising high-performing product categories and ad groups.

Phase 3: Sustained Success (Months 13–Present)

REGULAR PERFORMANCE REVIEWS

Conducted regular reviews with the client to discuss campaign performance, identify new growth opportunities, and adapt the strategy based on market trends.

ADVANCED SHOPPING FEATURES

Explored and implemented advanced Shopping features like Showcase Ads and Local Inventory Ads to further enhance product visibility and user engagement.

COMPETITIVE ANALYSIS

Regularly monitored competitor activity in the high-ticket hardware space to stay ahead of the curve with shopping ad strategies.

RESULTS

Our data-driven Google Shopping Ads strategy delivered exceptional results for the client's online sales:

- **Massive Sales Growth:** Monthly sales soared, significantly exceeding initial targets and showcasing the effectiveness of Shopping Ads for high-ticket hardware.
- **Increased Qualified Traffic:** Shopping Ads successfully attracted users with high purchase intent, leading to a higher conversion rate from website visitors to paying customers.
- **Improved Brand Awareness:** Optimised product listings and targeted campaigns increased brand visibility for the client's premium hardware within relevant search queries.
- **Optimised Advertising Spend:** By focusing on optimising product feed attributes and implementing smart bidding strategies, we achieved a significant return on ad spend (ROAS) for the client.
