CASE STUDY

OVERVIEW

J&J Gold | B U Y E R S

(<https://jjgolddbrowsers.com>)

Industry: Jewelry (Buy & Sell)

BACKGROUND

This account shows significant improvements in traffic and conversions over a 5 month period. The key challenge was high Cost/Conversion (CPC) and low volume of conversions in earlier months (Dec Feb), followed by gradual performance improvement driven by strategic optimization.

CHALLENGES

J&J Gold Buyers, a premium gold buying business, faced significant challenges in their digital advertising performance during the initial campaign months of December to February. Despite allocating a competitive budget to Google and Meta advertising, the cost per conversion (CPC) remained unreasonably high, while the overall volume of conversions was disappointingly low. This imbalance between investment and return made it clear that the existing ad strategy was not yielding sustainable results.

SEVERAL KEY ISSUES WERE IDENTIFIED DURING THIS PERIOD

- **Inefficient Ad Targeting:**

Ads were either too broad or reaching audiences with low buying intent, leading to high clicks but minimal actual conversions.

- **Weak Keyword Strategy:**

Non-converting or overly competitive keywords were draining the budget without delivering qualified leads.

- **Unoptimized Creatives:**

Messaging and visuals lacked the urgency and trust signals crucial for high-value transactions like selling gold, affecting both CTR and engagement.

- **Limited Local Targeting:**

For a business like J&J Gold Buyers, hyperlocal targeting is essential. Early campaigns failed to fully capitalize on local search intent.

- **No Retargeting Strategy:**

There was minimal follow-up on warm leads or visitors who showed interest but didn't convert initially.

Performance Breakdown MoM

Month	Clicks	Conversions	Cost	Cost/Conv
Dec 2024	139	8	\$1.72K	\$215.00
Jan 2025	153	18	\$1.55K	\$215.00
Feb 2025	167	13	\$1.48K	\$215.00
Mar 2025	203	14	\$1.64K	\$215.00
Apr 2025	325	22	\$1.73K	\$215.00

Key Observations

- **Click Growth:** From 139 in Dec to 325 in April (+133%).
- **Conversion Growth:** From 8 in Dec to 22 in April (+175%).
- **Cost/Conv. Improvement:** From \$215 in Dec to \$78 in April (–63.7%).
- **Stable Ad Spend:** Monthly spend remained around ~\$1.5K \$1.7K.
- **Strongest Month:** April delivered the highest number of clicks and conversions with the most efficient Cost/Conv.

OPTIMIZATION STRATEGY IMPLEMENTED

Despite offering specialized legal services for veterans, The People's Firm PLLC faced challenges in reaching their audience, generating website traffic, and building online credibility. Their conversion rate was not meeting their expectations.

Keyword Refinement

- Removed low intent and irrelevant keywords.
- Introduced high intent keywords aligned with bottom funnel queries.

Ad Copy Testing

- A/B tested ad creatives monthly.
- Improved CTR with benefit driven and urgency based messaging.

Bid Strategy Adjustment

- Gradually adjusted bids based on high converting segments.

Geo & Device Targeting

- Limited ad delivery to top performing locations and devices.
- Reduced wastage on low converting geos.

Conversion Tracking Optimization

- Ensured accurate GA4 and Google Ads tracking.
- Verified and corrected any under reporting issues from earlier months.

Campaigns Structure

- Started with only search campaign with different ad groups for each service
- Later created PMAX campaign to enhance performance

PERFORMANCE HIGHLIGHTS

Over the course of four months, strategic optimization efforts led to significant improvements in campaign performance across all key metrics:

Click Growth

- The number of clicks increased steadily from 139 in December to 325 in April, marking a 133% growth. This reflected improved audience targeting, more compelling ad creatives, and increased relevance in search and social placements.

Conversion Growth

- Monthly conversions rose from 8 in December to 22 in April, showing a 175% increase. This improvement was driven by refined targeting, landing page enhancements, and the introduction of trust-building elements that encouraged action.

Cost per Conversion (CPC) Improvement

- The cost per conversion dropped significantly from \$215 in December to \$78 in April, a 63.7% reduction. This was achieved by pausing underperforming keywords, focusing on high-intent audiences, and optimizing bids and budgets more strategically.

Consistent Ad Spend

- Despite performance fluctuations, the monthly ad spend remained relatively stable, ranging between \$1,500 and \$1,700. The improvements were not budget-driven but a result of strategic refinement and smarter ad management.

Strongest Month - April

- April emerged as the most successful month, delivering the highest volume of clicks and conversions, while also achieving the most efficient cost per conversion. This proved the impact of data-driven optimization and audience alignment.

CONCLUSION

By applying focused targeting, strategic bidding, and conversion tracking enhancements, the account significantly improved its efficiency and return. April stands out as the benchmark for performance, with the lowest cost per conversion and the highest lead volume, proving the effectiveness of consistent optimization.
