

CASE STUDY

GOOGLE ADS TURNAROUND FROM WASTED BUDGET TO PROFITABLE CONVERSIONS

Helping Victims of Online Blackmail with Legal Expertise

ABOUT

Our client, operating in a highly competitive market, was running Google Ads campaigns but saw minimal returns despite a significant ad budget. The campaigns were live, spending consistently, but they weren't driving meaningful conversions.

They came to us frustrated, saying:

"We're getting impressions and clicks, but there's no real business coming in. We're wasting money."

INITIAL CAMPAIGN PERFORMANCE (Before Optimization)

After auditing the Google Ads account, here's what we found:

- Clicks: 35.8K
- Conversions: 3.5K
- Cost per Conversion: \$162
- Total Cost: \$565K

Despite massive reach, conversion efficiency was almost nonexistent. Ad spend was leaking due to irrelevant traffic, poor targeting, and low-quality interactions.

BEFORE OPTIMIZATION

OUR OPTIMIZATION STRATEGY

We overhauled the campaign using a multi-layered strategy:

1. Refined Targeting

- Shifted from broad match to phrase/exact match keywords
- Built custom audiences based on buyer intent
- Added negative keywords to eliminate waste

2. Revamped Ad Structure

- Created high-quality, relevant ad copies
- Aligned ad messages with landing page content
- Used dynamic keyword insertion for higher relevance

3. Smart Bidding & Budget Restructure

- Enabled Target CPA bidding
- Distributed budget to best-performing campaigns/ad groups
- Set device-level bid adjustments to cut mobile waste

4. Landing Page Enhancements

- Improved page load speed and mobile usability
- Added strong CTAs and clearer value propositions
- Fixed broken forms and enhanced trust signals (e.g., reviews, guarantees)

5. Accurate Tracking

- Set up proper conversion tracking
- Added remarketing tags and goal-based tracking in Google Analytics

AFTER OPTIMIZATION

POST-OPTIMIZATION RESULTS (After 4–6 Weeks)

With nearly the same budget, we transformed campaign results:

Metric	Before	After
Clicks	35.8K	35.9K
Conversions	3.5K	3.9K
Conversion Rate	\$162	\$126
Total Cost	\$565K	\$493K

AD SPEND REDUCED:

- WENT FROM \$565,000 TO \$493,000, SAVING OVER \$72,000 WITHOUT SACRIFICING PERFORMANCE.

CONVERSIONS INCREASED:

- BOOSTED FROM 3,500 TO 3,900 LEADS, AN 11.4% INCREASE IN CLIENT INQUIRIES.

COST PER ACQUISITION (CPA) LOWERED:

- DROPPED FROM \$162 TO \$126, SAVING \$36 PER LEAD – A 22% REDUCTION.

TRAFFIC QUALITY IMPROVED:

- CLICK VOLUME STAYED NEARLY THE SAME (~35.9K), BUT CONVERSION EFFICIENCY IMPROVED SIGNIFICANTLY.

Client Reaction

“It feels like we’re finally running real ads. Leads are flowing in, and the cost makes sense. Same budget – but we’re seeing results for the first time.”

Ready for Your Turnaround?

If your Google Ads are underperforming or your CPL is
through the roof — let's fix it.
